

ABHISHEK BALSURE

Cloud & DevOps Engineer — Fresher

Pune, Maharashtra | +91 9021647454 | balsureabhishek@gmail.com |

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

BCA graduate (2026, SGPA 8.0+) with hands-on experience containerizing and deploying a production-style web application on AWS EC2, backed by a 3-stage GitHub Actions CI/CD pipeline. Independently diagnosed and resolved live server incidents — disk exhaustion, memory pressure, stale container images — on a running Linux instance. Comfortable across the Docker → Git → CI/CD → cloud deployment lifecycle; currently building depth in Kubernetes, Terraform, and monitoring tooling.

TECHNICAL SKILLS

Cloud: AWS (EC2, Lambda, ECR, S3, IAM, Security Groups) · Supabase (BaaS/PostgreSQL) · Cloudflare Pages/Workers · Render (PaaS)

Containers & CI/CD: Docker · Docker Compose · Docker Hub · GitHub Actions

Infra & Monitoring (in progress): Kubernetes · Terraform · Prometheus · Grafana · AWS CloudWatch

Linux & Networking: Ubuntu 22.04 · SSH · Bash scripting · Security Groups · Gunicorn

Programming: Python · Go

Databases: PostgreSQL · Supabase

Version Control: Git · GitHub

PROJECTS

ShieldGuard Pro — Cloud Deployment & ML Web App

Docker · AWS EC2 · GitHub Actions · Flask · Gunicorn · Random Forest

GitHub: <https://github.com/abhishek-balsure/shieldguard-pro>

- Containerized a Flask + ML app with a production Dockerfile (Gunicorn WSGI) and published the image to Docker Hub.
- Deployed and operate the app on AWS EC2 (t3.micro, Ubuntu 22.04, ap-south-1) with configured security groups and RSA key-pair SSH access.
- Built a 3-stage GitHub Actions CI/CD pipeline (validate → push to Docker Hub → auto-deploy to EC2 via SSH) on every push to main.
- Diagnosed and resolved live production incidents — disk-space exhaustion (resize2fs), memory pressure (swap), stale images — without downtime migration.
- Maintained separate Docker Compose configs for dev vs. production (no exposed DB ports) and authored a Jenkinsfile as a CI/CD alternative.
- Retrained the phishing-detection Random Forest model on 25+ URL features, reaching 88% test accuracy and 94.9% AUC-ROC across 4 detection modules exposed via REST API.
- Deployed the phishing-detection model as a serverless AWS Lambda function (containerized via ECR) with a public Function URL, demonstrating EC2 vs. serverless architecture tradeoffs within the same codebase.

NSS College Website — Full-Stack Volunteer Platform Live: <https://nss-website-8uv.pages.dev/>

Supabase (Postgres/Auth) · Cloudflare Pages Functions · GitHub Actions

GitHub: <https://github.com/abhishek-balsure/Nss-Website>

- Rebuilt a static college site into a full-stack platform using Supabase auth, PostgreSQL storage, and default-deny row-level-security policies.
- Implemented HMAC-signed session cookies for admin auth and multi-admin roles, plus private-bucket photo uploads for attendance.
- Automated CDN deployment via GitHub Actions → Cloudflare Pages for zero-downtime releases; now the college's active daily volunteer portal.

AI Smart Traffic Management System — Internal SIH 2025, 3rd Place

Python · Machine Learning · 24-hour hackathon

GitHub

- Built an ML-based traffic congestion prediction pipeline (data preprocessing → feature engineering → model training) end-to-end within a 24-hour sprint, placing 3rd of 30 teams.

EDUCATION

Bachelor of Computer Applications (BCA) — Sarhad College of Arts, Commerce & Science, Katraj, Pune (SPPU)

2023 – 2026 | SGPA: 8.0+ | Zero Backlogs

CERTIFICATIONS

- AI Fluency: Framework & Foundations — Anthropic (2026)
- Introduction to Model Context Protocol — Anthropic (2026)
- Introduction to Cloud Computing — IBM SkillsBuild (2026)
- Introduction to Cybersecurity — IBM SkillsBuild (2026)
- SQL (Basic) — HackerRank (2026)
- Go (Basic) — HackerRank (2026)

ACHIEVEMENTS

- Internal Smart India Hackathon 2025 — 3rd Place (AI Category) out of 30 teams.
- Presented ShieldGuard Pro live to industry judges at Innovyuh 2.0 (GDG On Campus, MIT Pune) as Team TechKnights.
- 6 self-initiated industry certifications across cloud, security, and AI.
- Languages: English, Hindi, Marathi (Native) | Immediately available for full-time roles.
